

PSS POLICY ANTI FRAUD, CORRUPTION AND CONFLICTS OF INTEREST

Updated December 2024 and Contextualized March 2025

I. INTRODUCTION

Integrity, probity and ethics are particularly important principles in a solidarity organization like *Promoting Skill For Success (PSS)*. The fight against fraud and corruption must be exemplary.

Fraud and corruption are multi-faceted scourges in that they :

- Divert resources essential to the economic and social development of societies (education, health, justice, etc.).

The Economic Forum estimates that the cost of corruption worldwide is at least \$2,600 billion, or 5% of global gross domestic product. And according to the World Bank, companies and individuals pay more than \$1,000 billion in bribes every year.

- Discourage investment: reluctance to invest because of the high and uncertain cost of doing business (bribes = variable taxes), the high legal risks, the danger to reputation and the unequal competition they engender.
- Promote inequality by, for example, reducing employment opportunities and prospects for the most disadvantaged (decisions not based on merit and equity).

Facilitating illicit trafficking and organized crime.

- Attack the foundation of democratic institutions by distorting electoral processes, perverting the rule of law and leading to ineffective systems of governance, fostering a culture of impunity that can lead to discontent and mistrust of leaders, institutions and the rule of law.

[At association level, acts of fraud or corruption :](#)

- embezzle resources intended for social purposes: project beneficiaries are the first to suffer as a result of such actions.
- This can seriously damage the association's reputation and reduce the trust placed in it by public and private funding bodies.

It is important to understand that :

The rapid injection of substantial resources (financial, HR, etc.) into environments that are often poor, unstable, where security is precarious and/or where institutions lack the capacity to play their role, significantly increases the risks/opportunities for fraud/corruption.

People's understanding and perception of fraud and corruption varies enormously. Some have a narrow definition, restricted to embezzlement, while others take a broader view. What is considered corruption in some cultures (nepotism, for example) may be perfectly tolerated in others.

Fraud and corruption are considered punishable offences or crimes under both criminal and employment law.

Corruption breeds more corruption. No country, no sector is immune.

According to an international survey on fraud and corruption, 38% of companies believe that corrupt practices are commonplace in business in their country (20% in developed countries, 52% in emerging countries).

To raise awareness of the need to combat fraud and corruption, Global Anti-Corruption Day is celebrated every December 9 (since 2003, United Nations Convention against Corruption), alongside which several global awareness campaigns have been launched: "*With corruption everyone pays*", "*You can stop corruption*", "*Your NO counts*", "*ACT Against Corruption Today*", "*Zero corruption - 100% development*", "*Break the Corruption chain*" (UNDP/UNODC).

The prevention and detection of fraud risks are the responsibility of each employee. They are required to carry out the necessary controls and to report any observations or suspicions of fraud/corruption or conflicts of interest of which they are aware and which may affect the association's funds and assets.

II. POLICY

PN prohibits all corrupt, fraudulent, collusive, coercive, abusive, obstructive, retaliatory, money-laundering or terrorist-financing practices, as well as all conflicts of interest in its

operations and activities.

PN applies the principle of "zero tolerance" to instigators and accomplices of acts of fraud, corruption or conflicts of interest concerning the use of its resources, be they employees or external partners (operational partners, suppliers).

PN is committed to doing everything in its power to prevent and detect all forms of fraud, corruption and conflicts of interest, and, where necessary, to carry out appropriate investigations and impose exemplary sanctions.

III. DEFINITIONS

1. Fraud :

Any act carried out knowingly and intentionally (which distinguishes it from error) with the intention of deceiving, concealing or violating trust, using unfair means intended to obtain consent or an undue material or moral advantage, or to evade the execution of the law.
Examples: tax evasion, money laundering, etc.

Fraud is perpetrated by individuals (employees or volunteers of the organization, or by outsiders) or organizations in order to obtain money, goods or services, or to secure an irregular personal or commercial advantage (reputation, social or political ends), for the benefit of one or more individuals, within or outside the association (families, communities, ethnic, regional or religious groups, political parties and organizations, professional or social corporations and associations, warlords and militias, etc.).

2. Corruption :

All acts by which an individual exerts undue influence (bribe, gift, insider trading or conflict of interest) during a transaction in order to gain an advantage for himself or someone else, in violation of his obligations to his employer or the rights of someone else. A distinction is made between :

- Active bribery: offering, proposing or giving, directly or indirectly, any undue advantage to a person for him/herself or for someone else, in order that he/she performs or refrains from performing an act in the exercise of his/her duties.
- Passive bribery: the act of soliciting or accepting, directly or indirectly, such an undue advantage.

Offering or accepting a personal gift to help someone, a potential beneficiary or a candidate to obtain something (job, position, compensation, etc.) constitutes an act of corruption.

3. Collusion:

Secret agreement between two or more bidders whose purpose is to artificially alter the outcome of the procurement procedure in order to obtain a financial or other advantage.

4. [Coercion:](#)

Involves undermining or harming, or threatening to undermine or harm, directly or indirectly, a person in order to improperly influence his or her activities or choices.

5. [Conflict of interest :](#)

Occurs when a person's private, outside interests affect their ability to act or perform their job duties fairly and impartially.

- Nepotism: abuse by a person who uses his or her authority to benefit family members.
- Cronyism: these are forms of conflict of interest. A conflict of interest may be real/actual, apparent/perceived or potential.

6. [Money laundering :](#)

Definitions :

- Acquire, own, use, convert or transfer (directly or indirectly)
- Concealing or disguising the illegal origin, source, location, movement or ownership ... of goods known to be derived from criminal activities.
- Facilitating, by any means, the false justification of the origin of the assets or income of the perpetrator of a crime or misdemeanor having procured for the latter a direct or indirect profit; or
- Assisting in the investment, concealment or conversion of the direct or indirect proceeds of a crime or misdemeanour.

Money laundering also involves helping anyone involved in such activities to avoid the legal consequences of their actions,

7. [Terrorist financing :](#)

Providing or collecting funds by any means, directly or indirectly, with the intention of using them or in the knowledge that they are or will be used, in whole or in part, to carry out acts of terrorism. This is a violation of a United Nations Security Council resolution.

It should be noted that some funders require their partners to ensure (*due diligence*) that the financing granted in no way contributes to any money laundering or terrorist financing activity whatsoever. *PN* therefore reserves the right to carry out such checks.

8. THE MEANS

Fraud, and in particular misappropriation of assets, is generally accompanied by swindling. Fraud is the act of deceiving an individual(s) or entity(ies) in order to lead them, to their detriment or to the detriment of a third party, to hand over funds, securities or goods, to provide a service or to consent to an act. Example: Collecting donations by posing as a

volunteer.

Fraud often involves the creation and/or use of forgeries, by falsifying documents or signatures. A fraudster may, for example :

- Use imaging or desktop publishing to produce false documents (quotes, invoices, diplomas, letters of recommendation, etc.), similar to originals but containing false information (e.g. bank details, amounts).
- Sign a purchase order or invoice by usurping the identity and/or signature of the authorized buyer.
- Alter or falsify a register (inventories, stock records, accounting journals, time sheets, etc.) by adding, deleting or failing to record one or more transactions.
- The scam may involve the misuse of an official element (e.g. an official stamp) or a genuine quality.
- The digital transformation/revolution underway for several years now has led to an increase in security breaches and fraud risks. Recent years have seen a marked increase in cybercrime (system intrusions and data theft), both external (organized) and perpetrated by malicious employees.

Finally, fraud can also involve the concealment (e.g. destruction of an application) or deliberate omission (e.g. declaration of a link of interest) of information or documents.

9. FIELDS CONCERNED

While fraud and corruption can affect any industry, they are particularly prevalent in the following sectors:

- Financial and accounting activities
- Payment of remuneration (salaries, bonuses, per diems, etc.) procurement (purchases, stocks, donations) and use of resources staff recruitment
- Project design and implementation
- Information management: data confidentiality and security

Fraud and corruption primarily concern the theft or misappropriation by someone of assets (money, goods or materials, data, etc.) belonging to the association, in order to use them for personal ends. But they can also involve an organization using them for purposes other than those contractually agreed with the organization funding them.

Fraudulent acts generally involve :

1. Administrative / General

- Administrative registration, in return for bribes (i.e. blocking processes or withholding documents or information in the absence of payment)
- Improper use of PN's stamp and/or letterhead
- Unjustified use of a waiver or emergency procedure
- Operation of a private company with association resources

2. [Finance](#)

- Theft of cash or bearer cheques
- Skimming refers to the theft of cash before it has been recorded by PN (e.g. accepting a cash donation without recording it - in full or in part - in the accounts).
- Disbursements: when a fraudster causes the association to pay for :
 - Fictitious goods, services and/or work (e.g. false invoices, false quotes or quotes resulting from collusion between suppliers, cheque forgery for the benefit of a third party, payment for the benefit of an individual instead of a company account)
 - For more than the actual price (overcharging)
 - For personal, lavish/excessive and/or self-indulgent purchases (including misuse of an association credit card, etc.).
- Expense claims: when an employee is reimbursed for fictitious, overvalued and/or unwarranted expenses (personal expenses) which do not correspond to reality.
- Payroll: when a fraudster causes the association to make a payment for fictitious or undue remuneration (fictitious employee, fictitious travel allowance).
- Unauthorized transactions (transfers, payments, loans, etc.).
- Recording of fictitious or inaccurate transactions (expenses, income, deposits)

3. [Logistics](#)

Purchasing :

- Payment of bribes to staff by suppliers in exchange for influence in the selection process (kickbacks)
- Collusion between bidders to inflate prices
- Creation of fictitious suppliers and/or fictitious bids to inflate prices or obtain the minimum number of bids
- Contract splitting to "lower" procedures (avoid competitive bidding),
- Non-compliance with the applicable procedure (unjustified use of direct purchasing)

for the sole purpose of avoiding the obligation of competitive bidding,

- Absent or limited competitive tendering, resulting in unfair advantage for the suppliers used
- Purchase unnecessary for program needs
- Consideration of bids disconnected from program needs and market prices
- Comparison of bids for incomparable services, failure to take into account quality of deliverables and/or ability of bidders to deliver
- Disproportionate and/or unjustified selection criteria
- Manipulation of calls for tender (documents, procedure), violation of transparency and fairness requirements in the selection process:
- Biased specifications and/or tender rules designed to favor or exclude certain bidders,
- Insider trading (sharing confidential information about the process or competitors' bids before the end of the procurement process) in order to give an advantage to a bidder,
- Working with suppliers to achieve the desired results,
- Acceptance of late bids,
- Unjustified exclusion of bids,
- Non-disclosure of conflicts of interest by selection committee members,
- Non-objective qualification of bidders,
- Non-compliant quality/quantity delivered or certification of the delivery of a good, service or work, without having carried out the necessary prior checks (reality, quality, quantity, contractual conditions),
- Contract (and amendments) not in line with the conditions of the selected offer
- Tolerating or ignoring deliberate supplier mismanagement

Equipment management (telephones, vehicles, etc.) :

- Theft or unauthorized borrowing of equipment or spare parts
- Replacement of new items with used items
- Use of association equipment for personal purposes
- Fake repairs or maintenance
- Vehicles: fuel theft

Inventories :

- Theft or unauthorized borrowing of stored goods
- Goods/supplies sold or used for personal purposes
- Unauthorized inventory withdrawal
- Falsification of inventory documents
- Fuel oil detour

Transport

- Theft, misappropriation of goods in transit
- Bribes paid to government departments (customs, health inspection, etc.)

4. [Human Resources](#)

- Preferential treatment the basis of personal relationships or motives (discrimination, conflict of interest, nepotism, favoritism, bribes) - not on the basis of qualifications, experience or merit:
 - Biased recruitment: Biased pre-selection (undue elimination of candidates) / Biased translation during interviews / Presentation of false documents (CV, diplomas, certificates/attestations of professional experience or training, etc.) / Fraud during tests and/or interviews (insider trading, external consulting, etc.)
 - Unfair/biased pay and working conditions
 - Unfair/bias evaluation and/or promotion
 - Biased disciplinary procedure (initiation, management)
- Bribes and/or sexual abuse in exchange for preferential treatment
- Payment of undue remuneration :
 - Dummy employee
 - Wrong amount
- Claiming fictitious entitlements and/or those linked to fictitious travel (per diem, leave, etc.)
- Management bias
 - Failure to record absences/leave or false reasons for absence
 - Use of working time for private purposes

5. [Programs](#)

- Needs assessment and selection/targeting of beneficiaries :
 - Areas or (groups of) people favored (or excluded) for reasons of political, ethnic, religious, tribal or clan affiliation, or in exchange for bribes or favors (sexual or otherwise).
 - Overestimating the budget in order to pocket kickbacks during the construction phase
 - Conducting lenient audits and/or assessments in exchange for bribes or favors
- Activities :
 - "Phantom" beneficiaries (number of beneficiaries fictitiously inflated) or multiple registrations for misappropriation purposes
 - Falsification of activity reports
 - Change in the amount, size, composition or quality of what is paid/distributed (compensation, goods, inputs, etc.)
 - Taxation and "expropriation" after distribution of benefits (unofficial "taxes" by local authorities, looting)
- Use of project resources for other projects

- Use of project resources for special interests
- Sale or mismanagement of waste products

6. [Fundraising](#)

- Use of donation funds for personal purposes
- Misuse of donations
- Issuing a fictitious tax receipt

7. [Data, information](#)

- Theft (e.g. by phishing e-mail), falsification or destruction of personal and/or sensitive documents/data
- Use or sale of information for personal gain or advantage
- Downloading and transmitting confidential information to an unauthorized party
- Making false declarations

10. DETECTION

Such indications do not in themselves constitute proven acts of fraud or corruption, but may point to the need to improve certain procedures and practices:

- Missing supporting documents (invoice, payment receipt, stock sheet, equipment sheet, etc.).
- Blank and/or undated cheques
- No formal validations
- Irregular reconciliations or failure to balance accounts
- Figures, trends or results not in line with objectives, unexplained deterioration in financial results
- (Requests for) cash payments (possibly without receipts)
- (Requests for) payment to an individual instead of a corporate account
- (Requests for) unusual, exotic payments (terms, destination)
- Unusual transactions with related parties
- Links of interest,
- Refusal to produce files, minutes or other records
- Rare absences or refusal to delegate responsibilities during leave/absences
- A climate of crisis and pressure
- Frequent staff turnover
- Concealment of professional shortcomings
- Employees with outside interests or jobs
- Employees with financial difficulties or addictions (gambling, etc.)
- Inconsistencies in document dates or illogical sequence of
(e.g.: *The date of the offer is prior to that of the solicitation or publication of the invitation to tender / The date of the offer is subsequent to that of the award of the contract / The date of the successful bidder's offer is significantly later than the offers of all the other*)

bidders / The dates shown on the documents are not consistent with the dates shown on the attached documentation (e.g. date of the offer not consistent with the date of the postmark on the envelope, date of an implausible certificate, etc.).

- Unusual similarities between bids from candidates participating in the same call for tenders
(e.g.: Identical wording, phrases and terminology / Dates of bidders' offers are identical / Identical spelling or typographical errors / Identical layout and format (font, font size, table size, etc.) / Similar letterheads or logos / Identical prices for several items / Similar stamps and/or signatures)
- Manual alterations to original documents (e.g. manual modifications, text erased with tipex, etc.) Use of photocopies instead of original documents, use of pro forma invoices as supporting documents instead of official invoices.
- Inconsistencies in the process
(e.g.: Award decisions not consistent with selection or award criteria / Errors in the application of selection and award criteria / A regular supplier is a member of a tender evaluation committee)
- Other examples revealing a risk of privileged relations with bidders
 - *The same bidder is selected in an exceptionally large number of bids*
 - *A bidder is frequently awarded contracts for different types of goods or services*
- The winning bidder charges for additional goods not included in the bid (spare parts, installation costs, etc.).

11. PREVENTION, DETERRENCE

Preventing fraud and corruption within the association involves a number of actions:

- Implementation of clear policies to prevent ethical risks (including fraud/corruption)
- Clear communication by management to all employees, partners and service providers of the association's mandate, values and principles in terms of ethics, integrity, probity and compliance.
- All (new) employees are systematically made aware of :
 - Risks, principles, rules and procedures set out in the association's policies and code of conduct
 - Impact, risks, prevention and detection of fraudulent practices.
 - Internal rules and procedures (including controls)

In order to encourage buy-in, ownership, responsibility and vigilance. The fight against fraud, corruption and other unethical behaviour is everyone's business.

- All employees are required to take the UN/UNICEF "Fraud Awareness" online session, available on the "Agora" platform (see appendix for access details).

- PN Code of Conduct signed by all individuals or organizations having a contract with PN
- Increase awareness of the possibility of being caught: communication on controls and reporting mechanisms
- Increase the perception that if you're caught, the penalties will be exemplary.
- Strict transparency and fairness must be ensured at all times
 - Widest possible publication and easy access to competitive bidding data.
 - External communication of NP rules/procedures (e.g. supplier purchasing processes)
 - Negotiate contractual agreements with suppliers and partners and concluded in full transparency. Any contractual deviation must be justified
 - Implementation (verified) of clear, known and understood rules/procedures, particularly for sensitive processes (transfers, donations, gifts, etc.).
 - Implementation of (formalized) validation procedures, verification of validations
 - Limit access/protect sensitive assets, secure premises and cash registers/cases/cupboards containing assets (including key management), passwords, double signature on cheques, minimize cash in cash registers/cases, limit operational advances...)
- Use of information systems (e.g. ERP) enabling secure implementation (access/identification) of processes and controls, and secure, controlled storage of information and documents.
- Closely supervise or even be directly involved in processes (e.g. participate in negotiations with suppliers)
- Effective separation of tasks/functions, job descriptions detailing the roles and responsibilities of each person, particularly for financial functions/tasks and those related to procurement (purchasing, inventory) and equipment management. The same person must not be both judge and jury (i.e. be in charge of an action and at the same time control its execution, or authorize an action and at the same time carry it out). It is therefore essential to ensure a division of responsibilities between those who :
 - Physical custody and management of assets (goods, money)
 - Authorize or approve transactions relating to these assets (purchases, stock movements, etc.).
 - Record or report transactions and reconcile accounts.
- Internal controls and audits: internal controls are carried out on a regular basis, in particular on the most exposed processes (purchasing, accounting, inventories, conclusion of contracts, international activities, distribution of aid, etc.), large or unusual transactions and authorizations

- It is important that these checks are carried out independently (see segregation of duties/functions).
- These checks generally take the form of verifications (surveys, checklists, counter-calls using official/known contact details, taking HR references and checking diplomas, verifying the absence of family ties between colleagues, etc.) and/or reconciliations (e.g. consumption vs. activities, historical data, theoretical vs. actual balance, etc.). These checks can be carried out either systematically, on a regular basis (e.g. monthly bank reconciliations) or by sampling (e.g. monthly survey on receipt of financial aid).

Third-party entities and/or individuals involved in the process, in particular those who are the originators of the funds received and/or for whom the funds are intended, are subject to AP Solutions-type existence and compliance checks. These checks are carried out prior to contractualization.

Internal and external audits (independent, PN Global Audit Committee) are carried out regularly to ensure that controls are in place and operating effectively. Prompt implementation and regular follow-up of audit recommendations.

These regular checks and audits must be supplemented by unannounced checks and audits.

Sufficient resources must be allocated to carry out these controls and audits.

Ensuring that all employees are aware of the existence of such controls is a major means of preventing internal fraud.

12. FRAUD / CORRUPTION REPORTING

In accordance with our policy on ethical risk prevention and whistle-blowing, PN employees are required to report any information relating to the following to the whistle-blowing unit without delay (as soon as they become aware of it):

- Practices that contravene - or are suspected of contravening - professional ethics clauses, procedures and the ethical framework (CEC, etc.).
- Attempts or acts of fraud or corruption, known or suspected, of which they are victims or witnesses
- Conflicts of interest - real, perceived or potential - of which they are aware

All such reports are taken into account and analyzed. They are dealt with in accordance with the procedure for handling alerts, while respecting the principles of impartiality, confidentiality, presumption of innocence (for those implicated) and protection (for whistleblowers). Any defamation may be punished. All such reports are recorded in the whistleblower register.

13. DISCIPLINARY AND FINANCIAL SANCTIONS

Exemplary sanctions are systematically applied to those found guilty of such acts (dismissal, suspension of trading and blacklisting, etc.). PN may also require such individuals to return

misappropriated funds and/or reimburse losses incurred as a result of their actions.

14. THE ROLE OF STAKEHOLDERS

The fight against fraud, corruption and other unethical behavior is everyone's business! Each employee undertakes to :

- Refuse any gift, solicitation or any other form of advantage, whether direct or indirect, and inform your manager accordingly. Pay close attention to the context and meaning of a gift/benefit, which must not imply any expectation of a quid pro quo.
- Avoid participating in any activity that could give rise to a conflict of interest. Avoid situations where you could be seen to benefit directly or indirectly, or to allow a third party to benefit, from decisions you might make.
- Comply strictly with :
 - Provisions of the association's policies and code of ethics
 - Procedures and controls applicable to its field of activity
- Promptly report any practice that is (or is suspected of being) contrary to these policies/codes/procedures/controls, or any attempt to do so, including any possible conflict of interest.
- Never tolerate or facilitate (or give the impression of doing so) any fraudulent practices (corruption, collusion, conflict of interest, etc.) in its activities. Where appropriate, cooperate in investigations following reports of fraud or corruption.

Management develops appropriate internal control strategies and procedures to ensure that identified risks do not turn into acts of fraud.

Management makes available adequate resources and means to prevent, detect and deal with fraud. It ensures the establishment and effective implementation of system(s) for reporting and handling reports, and where necessary, exemplary sanctions.

Managers are expected to demonstrate exemplary behavior and leadership in the fight against fraud and corruption. In particular, they are responsible for :

- Constantly supervise their activities and employees, and assess any internal or external risk of fraud or corruption. They must implement control mechanisms to prevent such practices.
- Ensure that all employees are familiar with and apply the controls and business framework.

APPENDICES

E-learning : Fraud awareness

E-learning: Fraud awareness

Online courses on fraud awareness are provided by the UN/UNICEF and are available on the platform named "Agora".

You can access Agora from any computer, tablet or smartphone connected to the Internet.

Open the window of your favorite web browser and enter the URL :

<https://agora.unicef.org> or <https://agora.unicef.org/course/info.php?id=24880>

Then click on "login" in the top right-hand corner of the home page. If you don't have an account, you can create one. You can register for free and use the "guest login" process.

The screenshot shows the AGORA platform interface. At the top, there is a menu icon and the AGORA logo. A search bar contains the text "Search all activities". Below this, a course card is displayed for "Fraud Awareness (implementing partners edition)". The card features a thumbnail image of a group of people in a classroom setting. To the right of the thumbnail, the course title is written in bold, followed by a description: "Raise awareness of fraudulent practices and assist implementing partners and staff in performing their role in combatting fraud." At the bottom of the card, there is a blue button labeled "Online Courses UNICEF activity" with a download icon.

Below this, a course card is displayed for "Sensibilisation à la fraude (édition partenaires d'exécution)". The card features a thumbnail image of a group of people in a classroom setting. To the right of the thumbnail, the course title is written in bold, followed by a description: "Sensibiliser aux pratiques frauduleuses, aider les partenaires d'exécution et le personnel à assumer leur rôle dans la lutte fraude". At the bottom of the card, there is a blue button labeled "Cours En Ligne UNICEF activity" with a download icon.

Reminder

PN applies the same standards as the UN. The abbreviation "UN" in the description below will be replaced by "PN" where appropriate.

This e-learning course is made up of a series of lessons designed to make you aware of fraudulent acts, familiarize you with a series of measures to combat them, and understand the

impact and consequences for the PN association and staff.

Through discussions, examples and case studies, the course will familiarize you with the United Nations and PN standards of conduct in the fight against fraud and your obligations to respect these standards, what you can do to prevent fraud and how to report such abuse by PN staff. If you are a manager (head of office / head of department), you will discover the additional responsibilities necessary to ensure compliance with PN's standards of conduct.

REMINDER:

PN applies the same standards as UN standards. The abbreviation "UN" in the description below will be replaced by "PN" where appropriate.

This e-learning course is made up of a series of lessons designed to make you aware of fraudulent acts, familiarize you with a series of measures to combat them, and understand the impact and consequences for the PN association and staff.

Through discussions, examples and case studies, the course will familiarize you with the UN and PN standards of conduct in the fight against fraud and your obligations to respect these standards, what you can do to prevent fraud and how to report such abuse by PN staff. If you are a manager (head of office / head of department), you will learn about the additional responsibilities required to uphold PN's standards of conduct.

Learning objectives

At the end of this course, you will be able to:

Understand the essential elements of fraud

Learn about the most common frauds affecting humanitarian and development organizations

Recognize the profile of a fraudster and the factors that lead a person to commit fraud

Identify alarm signals and react appropriately

Use resources and tools to combat fraud in the humanitarian sector.

Length

It should take you approximately 60-90 minutes to complete this course at your own pace.

Length:

It should take you approximately 60-90 minutes to complete this course at your own pace.

Structure

1- Why is it important to talk about fraud in humanitarian and development organizations?

2- What is fraud and what are the most common types of fraud?

3- Why are humanitarian and development organizations not immune to fraud?

4- Every person counts.

5- How can we spot the warning signs?

Structure :

1- Why is it important to talk about fraud in humanitarian and development organizations?

2- What is fraud and what are the most common types of fraud?

3- Why are humanitarian and development organizations not immune to fraud?

4- Every person counts.

5- How can we spot the warning signs?

This course consists of

Lessons contain a mix of case studies, short examples and scenarios created to reinforce the specific messages in each lesson. Lessons also reference and provide information on specific rules and policies.

Each short session ends with a quick assessment; a certificate can be printed on successful completion.

Note: you must complete a quick course quality assessment form (questionnaire) to receive your certificate of completion.

The certificate of achievement is the proof you need to provide to your administrative Manager.

This course consists of :

Lessons contain a mix of case studies, short examples and scenarios created to reinforce the specific messages in each lesson. Lessons also reference and provide information on specific rules and policies.

Each short session ends with a quick assessment; a certificate can be printed on successful completion.

Note: you must complete a quick course quality assessment form (questionnaire) to receive your certificate of completion.

The certificate of completion is the proof you need to provide to your Administrative Manager.

Instructions

The finance and admin manager must provide his or her certificate of achievement to PN's country director

Staff members and contractors must provide certificates to their HR Manager/Admin and finance manager

Instructions:

The Administrative and Admin Manager must provide his or her certificate of achievement to the PN CFO.

Staff members must provide their certificates to their Human Resources Manager.
